PROFILE

I love building things—especially in the digital world. My journey began years ago with web development, and I still enjoy it just as much today. Over the years, I've worked across the full stack, from frontend development to system administration. What drives me most is learning new technologies and applying them to create better solutions.
I believe that a good job is one done with care and excellence, and I bring that mindset to everything I do.

EXPERIENCE

PyreneesChallenge
May 2025 - Now   Jack of all trades

Description: Planned and managed a large-scale motorcycle event in the Pyrenees, coordinating website development, progress-tracking tools, logistics, and participant communication to ensure an efficient, well-organized, and successful experience.

Tools:
React Native   Jazz-Tools   Nextjs

Landbot
Oct 2022 - Now   Engineering Manager

Description: Leading two teams simultaneously (Platform and Product), driving collaboration and alignment by fostering a culture of knowledge sharing, training, and continuous improvement. Enhanced documentation standards and streamlined decision-making processes. Designed and implemented new CI/CD pipelines, transitioning from once-per-day deployments to continuous deployment. Established and scaled a company-wide observability culture, ensuring higher reliability and faster feedback loops.

Tools:
React   Python   Fast Api   GCP   Terraform   Kubernetes

Tinybird
Feb. 2022 - Sep. 2022   Frontend Developer

Description: Developed new features to optimize query and endpoint performance through materialization. Enhanced the online query editor by introducing intelligent hints and improved error highlighting for better usability and debugging efficiency.

Tools:
React   Redux   ClickHouse   Graphql   Ansible

Kodify
Oct. 2015 - Feb. 2022   Fullstack Developer

Description: Led the migration of a high-traffic Symfony/jQuery website (porntube.com) to a modern Node.js/React platform. Designed and implemented a high-throughput event logging system leveraging Node.js, AWS Kinesis, and Redshift to power internal analytics and reporting. Directed the migration of Blacked.com from a React SPA to an ISR-enabled Next.js application with GraphQL, improving scalability and performance.

Tools:
React   Redux   Next.js   Graphql   Kinesis   Redshift   Kubernetes

Chicplace
Apr. 2014 - Oct. 2015   CTO

Description: Led a team of 4 developers in refactoring and modernizing the platform's codebase. Improved system architecture by introducing autoscaling capabilities and migrating services to AWS. These enhancements significantly boosted platform performance and enabled successful market expansion into LATAM.

Tools:
Symfony   Vagrant   Bootstrap

Ofertix
Jun. 2010 - Apr. 2014   Tech Lead

Description: Developed both backend and frontend for all Ofertix.com platforms (Ofertix.com, NiceAndCrazy.com, NiceAndCrazy.fr, Primeriti.es). Additionally, built supporting projects, including a custom deployment system inspired by Capistrano and a Redis-based HTTP cache library for Symfony.

Tools:
Symfony   RabbitMQ   Capistrano
